Bangalore,India

I am a self-taught Front-end Engineer with more than 2 years of industry experience. I am currently focusing on building both mobile and web applications using Flutter.

WORK EXPERIENCE

Software Engineer -1,   Digital Green | July. 2021 – Nov. 2022

Developed and Implemented the below mobile and web application from the ground up :

- Developed a mobile-first application using Flutter to document the process of crop creation and create farmers' profiles.
- Involved in developing a datahub platform for enabling direct data sharing between organizations to prevent unintentional data misuse. Built the front-end of this application using ReactJS from the ground up with a small team of three engineers.
- Responsible for bug fixes and documentation.

Software Engineer Intern   Vrook-Transforming Learning | Oct. 2019 – April. 2021

Designed,Developed and Implemented the below web application from the ground up :

- Designed and developed custom mobile-responsive themes for OpenEdX LMS.
- Implemented new features for booksbeka.com using OpenCart.
- Designed and developed the company's blogsite using GhostJS.

PROJECTS
